Student Feedback on Teaching

Student Descriptive Input about the Instruction

Instructor Name	Term Code	Department	Course Number	Section No	Activity Type	No. of Students	No. of Submissions	No. of Valid Submissions
Nokhaiz Tariq Khan Akbar Khan	202410	Industrial Systems Engineering	291	04	LEC	32	24	21

Number of students indicating a teaching element as most helpful for learning:

S. No.	Teaching Element	Student Count
01	Support from the instructor	14
02	Feedback from the instructor	19
03	The level of learning challenge	10
04	The quality of the course materials	12
05	The clarity of the instructions for assignments	9
06	The clarity of the course work evaluation / grading scheme	5
07	The use of active learning practices	5
08	Interactions between students	5
09	Instructor communication about the course activities (for example, emails)	7
10	The organization of this course	8
11	The active class participation	6
12	The assignments or projects	7

Other specified teaching elements as most helpful for learning:

No Data available for the selected prompts.

What knowledge or skills have you learned or improved in this course?

S. No.	Open Comment
1	Data analysis
2	I learned what are the differences of data analytics, data engineers, and data scientist. I also learned how to clean data in a dataset and visualize the variables using different graphs plots, and other useful functions in the course.
3	I've learned the basis of data science and management

What do you like the most about this instructor?

S. No.	Open Comment
1	Extremely helpful and empathetic, provides emotional support, understanding and excels at his job. He shows up everyday with a smile and never fails to make an interesting lecture. Welcomes every question no matter how little. By far one of the best doctors I've seen on this college.
2	He is very cooperative and knowledgeable of material. However, I think reaching the information to the student needs Better improvement

S. No.	Open Comment
3	His ability to make you understand the topic
4	I like the way he explains the material and how he encourages students to participate with him during class, and also how cooperative he is during his office hours and in MS teams to help students understand.

What improvements to the course would you recommend?

S. No.	Open Comment
1	Decrease the amount of content
2	Make the assignments more involved to the material of the course
